

Milk River Watershed Council Canada Science Forum

November 8, 2018
Milk River Civic Centre
9:30am-3:00pm

Please join us and discover some of the eye catching scientific research and monitoring projects taking place in the Milk River watershed, surrounding areas and other studies whose objectives impact the watershed ecosystem.

Come and witness researchers and others experts share their findings with engaged community members and stakeholders.

Lunch will be provided

Registration fee: \$10/individual, Students free

To register call: 403-647-3808

or email: mary@mrwcc.ca

Registration deadline: November 5, 2018

Some of the topics include:

- **Characterizing water quality in the tributaries to the Milk River**
- **Source and variation of salts in the Milk River**
- **Methods to reduce amount of stormwater being discharged to area creeks and ways to improve the stormwater quality in urban areas**
- **Insects returning after the burn – Milk River Natural Area**
- **Insect food availability and utilization for sharp-tailed grouse in Alberta using stable isotopes**
- **And more!**
