

## **Call for Proposals for the Milk River Watershed Science Forum**

November 8, 2018 - Milk River Civic Center

The Milk River Watershed Council Canada (MRWCC) is inviting proposals for presentations on Research and Monitoring studies done in the area, surrounding areas and/or other studies that would impact the watershed ecosystem.

The Milk River watershed is a small, semi-arid and trans-boundary watershed. Climate in the Milk River watershed is unique in comparison to the rest of Alberta. The semi-arid environment has influenced not only the soils, vegetation and wildlife in the watershed, but it has also shaped the people, industry and economic growth in the region.

This science forum is a way to showcase scientific research that has taken place in the Milk River watershed, surrounding areas and other studies whose objectives impact the watershed ecosystem. This forum provides a stage for researchers to share their findings with engaged community members and stakeholders.

Presentations should be no longer than 20 minutes with panel questions at the end of each session. Also accepting poster presentations.

### **Deadline for proposal submission is October 26, 2018**

For more information or to submit your proposal please email [mary@mrwcc.ca](mailto:mary@mrwcc.ca)

Submit a proposal outlining a short description of your research in 500 words or less. Please include the following information:

- Name
- Job Title
- Company or Organization's Name
- Contact Information
  - Phone
  - Email
- Proposal Title
- Please attach: Presentation Short Abstract and Presenter's Brief Biography
- Session Type: Presentation or Poster
- Audience Level: General/Academic
- Video URL (If you have a video proposal available online, enter the URL.)

Please feel free to attach any additional information
